

MICHAEL BEN-IKHELOAH

Computer Engineer | Software Developer | Cybersecurity Enthusiast
Abuja, Nigeria | +234 706 888 5366 | mikeeben10@gmail.com | LinkedIn: [Michael \(E.\) Ben-Ikheleah](#) | GitHub: [Raumedeuter](#) | Website: [My Portfolio](#)

PROFESSIONAL SUMMARY

Computer Engineering graduate and software developer with experience building web applications and contributing to enterprise and government software solutions. Skilled in full-stack development, frontend engineering, technical support, and translating technical requirements into practical software solutions, with additional experience in cybersecurity and infrastructure environments.

EDUCATION

Bachelor of Engineering (B.Eng.) in Computer Engineering | 2020 – 2025

Afe Babalola University – Ekiti State, Nigeria

- **Thesis:** Design and Implementation of an IoT-Based 1.8kWh Remote-Controlled Lithium-Ion Battery Bank System.

PROFESSIONAL EXPERIENCE

Software Developer | July 2022 – Present

Frontend Development Intern | March 2024 – September 2024

Computer Engineering Intern | July 2023 – September 2023

Pyrich Group Limited – Abuja, Nigeria (Internship transitioned to Full-Time)

- Contributed to the development of the Labour Market Information System (LMIS), supporting frontend implementation using React.js and Node.js.
- Supported government and enterprise software initiatives, including NSITF EBS testing, domain configuration, and technical system support.
- Designed and deployed responsive web solutions for clients, including Piratech Nigeria Limited, 042 Engineering Limited, Pyspace landing page.
- Contributed to infrastructure, technical documentation, and security-related activities across enterprise and government projects including National Inland Waterways Authority and Nigeria Electronic Labour Exchange (NELEX) projects..

- Verified and registered 200+ MDA codes on the FCC portal to support secure system access and administration.

Cybersecurity Intern (Remote) | January 2024 – June 2024

Hagital Consulting – Lagos, Nigeria

- Performed hands-on web security testing and ethical hacking simulations involving SQL injection, XSS, and authentication attacks using Burp Suite and Metasploit.
- Conducted vulnerability assessment and network traffic analysis using tools including Nmap and Wireshark.
- Worked with Kali Linux, Ubuntu, and Windows environments while developing knowledge of GRC principles and security frameworks.
- Completed hands-on labs focused on web vulnerability scanning and penetration testing methodologies.

SELECTED PROJECTS

IoT-Based 1.8kWh Battery Bank System (Capstone Project)

- Designed a remote-controlled lithium-ion battery bank integrated with IoT for real-time monitoring and power management.

The Habakkuk 2:2 (Full-Stack) ↗ *

- **Full-Stack Development:** Developed a full-stack e-commerce platform for a journal business using React, Tailwind CSS, Node.js, and Vercel Serverless Functions.
- **Payment Integration:** Integrated the Paystack API to support secure online payment processing and checkout functionality.
- **E-Commerce Functionality:** Built core shopping features and server-side functionality to support product browsing, order processing, and a responsive purchasing experience.
- **Production Deployment:** Deployed the application on Vercel, leveraging serverless functions to support backend functionality alongside the React frontend.

Sunce Energy Website (Client Project) ↗

- **Frontend Lead:** Engineered a professional, multi-page corporate platform for a renewable energy firm using **HTML5, CSS3, and JavaScript (ES6+)**.
- **Product Architecture:** Built an interactive product gallery for high-tech energy

solutions (Inverters, LiFePO4 batteries), focusing on scalable UI components.

- **DevOps Collaboration:** Collaborated with a backend developer to manage version control and successful production deployment via **Vercel**.

TECHNICAL SKILLS

- **Languages & Web:** JavaScript, TypeScript, HTML/CSS, SQL
- **Frameworks & Libraries:** React, Next.js, Node.js, Express, Laravel, Tailwind CSS, PWA, Bootstrap
- **Databases:** PostgreSQL
- **Cybersecurity:** Burp Suite, Nmap, Wireshark, Kali Linux, Vulnerability Assessment, Ubuntu
- **Tools & Platforms:** Git/GitHub, MS Azure DevOps, Vercel, Vite, Windows Server, VMware, Oracle VirtualBox.
- **Soft Skills:** Analytical Problem Solving, Technical Writing, Requirement Gathering, Team Collaboration.

CERTIFICATIONS

- **Certified in Cybersecurity (CC)** – ISC²
- **ISO 27001 Foundation** – Information Security Management
- **Technical & GRC Cybersecurity** – Hagital Consulting
- **Responsive Web Design** – freeCodeCamp
- **Linux Operating System** – Great Learning
